

## **JOB DESCRIPTION**

---

**Position Title:** Web Developer                      **Industry:** Life Insurance  
**Reports To:** Chief Technology Officer              **Salary Range:** Competitive

### **Company Overview:**

LifeTrends® is a dynamic organization specializing in providing product intelligence to life insurance companies and Insurance Distribution Organizations. Our services help organizations in our industry price their products by providing them with information related to their competitive positioning in the marketplace. As a value centered organization, LifeTrends® is leading the evolution of future planning. Our team culture is founded upon the development and implementation of technology and processes that allow and adjust for rapid change and new information.

### **Position Summary:**

The web developer will be responsible for development work on LifeTrends web applications. This role will continuously evolve our existing platform and be part of the team developing new and maintaining existing applications. LifeTrends client portals are data intensive products with interactive features, so familiarity with MVC frameworks, JavaScript frameworks, charting libraries and API layers is preferred. Candidates with skills in C#, Azure DevOps, or SQL will be prioritized.

### **Essential Job Functions:**

- Modernize and update existing functionality to current standards
- Ensuring correct operation of the web application for all supported browser versions.
- Write and maintain unit tests.
- Implement and update user interfaces according to design changes
- Aligning existing code to consistent policies and frameworks
- Assist the business by handling high level technical support
- Development of new website features and reports
- Contribute, develop, and implement ideas that will help LifeTrends® provide new and innovative solutions to their clients
- Keep up with and evaluate the latest web development technologies and standards
